## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-31 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent Number 4,883,296 to Laurie.

Laurie discloses an opening arrangement for a vehicle door having a lock fastened between an inside panel and an outside panel of a vehicle door (25, figure 1) which is fastened to the inside panel, said lock having a release lever (5) for eliminating a locking position of the lock, and an outside operating mechanism (figure 1) acting upon the release lever by way of a force transmission element, the outside operating mechanism comprising a supporting part (2) fastened to an interior side of the outside panel and a swivelable pull handle (1) arranged on the exterior side, wherein a catching device (12c) is provided, as viewed in a driving direction, adjacent a rear side of the lock within the vehicle door, and is capable of when a defined lateral acceleration acts upon the vehicle, the catching device interacts with the supporting part of the outer operating mechanism and limits a bulging of the outside panel toward the outside to prevent unintentional release of the vehicle door lock, as in claims 1 and 25.

Laurie also discloses the catching device being a catch pin (12c), that extends in a longitudinal direction of the vehicle, and a holding part (figure 1, adjacent to element 17), that is

Art Unit: 3676

aligned in a transverse direction of the vehicle, and has a receiving device (aperture within 17) that surrounds the catch pin, as in claims 2 and 26, wherein the catch pin is provided on the supporting part (figure 1), as in claims 3 and 27, and the catch pin being constructed in one piece with the supporting part (), as in claims 4 and 28, as well as the catch pin being formed by a separately manufactured part that can be fastened to the supporting part (figure 3), as in claim 5.

Laurie further discloses in an inoperative normal locked position of the vehicle door, the receiving device of the holding part extends at a radial distance from the interior catch pin, whereas, starting from a defined lateral acceleration acting upon the vehicle, the catch pin is locally supported on the outer edge of the receiving device (figure 1), as in claims 6-8 and 29, wherein the holding part is formed by a molded-on lug of an interior door reinforcement (figures 1 and 3), as in claims 9-12 and 30, and where the holding part is formed by a bent-away lug of the lock (figures 1 and 3), as in claim 13-16, as well as the holding part being fastened to the inside panel (figures 1 and 3), as in claim 17-20, wherein the catch pin protrudes through the receiving device of the holding part and projects beyond the receiving device on both sides (figure 1), as in claim 21-24 and 31.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-31 have been considered but are moot in view of the new ground(s) of rejection.
